

# Payment360

## Actionable Insights to Manage Medicare & Medicaid Costs & Revenue

Healthcare360 is a cloud data platform company offering 8 modules to manage all aspects of Medicare, Medicare Advantage, Medicaid, and other Risk Sharing programs. Anblicks built a 100% cloud native data and analytics platform on Microsoft Azure. PAYMENT360, the first module of HC360 provides actionable insights to costs and revenues, provides state of the art solutions to decrease costs and to increase revenue, provides cash flow insights and simplify RA payment models and processes to help healthcare organizations identify what they will get and when they will get it, as well as to identify any gaps in payments.

### About Customer

A US based cloud data platform company

### Industry

Healthcare

### Technologies

- Microsoft Azure
- React Native

### THE PROBLEM

- Lack of visibility on the investments made and cash flow.
- Loss of revenue due to missing capturing chronic conditions aka HCC (Hierarchical condition category).
- No data platform or data warehouse to cross check the manual errors.
- No way to predict the upcoming revenues and plan the investments accordingly.

### THE SOLUTION

- Interactive actionable dashboards of payment and claims data.
- State of the art Analytics Engines to identify, predict, reconcile, track and report all aspects of capturing acute and chronic conditions.
- State of the art Analytics Engines to calculate and predict Risk Factors which leads to decrease costs and increase revenue.

### BENEFITS

- Reduced operational costs and time by utilizing high performance, self-managed, cloud based infrastructure solutions
- Decreased medical costs and increase revenue
