

Integrating Data Silos

Integrating Healthcare Data across Claims, Member, Provider & Encounters to improve care delivery

About Client

- The nation's No 1 population health organization focused on providing the highest level of care through physician-driven strategies
- Serving patients & doctors with the most accurate information and insight

Business Drivers

- Loss of revenue due to inefficient & manual data processing
- Adhering to new Government regulations
- Frequent changes to input file formats from various sources

Approach and Deliverables

- Integrate Claims, UM, Provider, Member and Encounter (EDI ANSI X12 5010 & 4010) data
- Ongoing data integration with data from FACETS, QNXT, EPIC, NEXTGEN, etc.)
- Design run & manage automated ETL processes to develop claims reports & extracts for partners like CNC (Care 'n Care) and UHC (United Healthcare)

Outcomes/Benefits

- Ability to scale quickly to meet increasing data needs (incoming & outgoing)
- Manage source data complexity in a cost-effective manner
- Address peaks in demand by repeatable and reusable data integration frameworks
- Focusing health data expertise on demand
